

Technical Requirements 2025

This technical rider outlines the requirements for the band, consisting of 10 musicians, but an ensemble of 8-10 may perform depending on availability and contract. We are happy to resolve any changes from the rider via a phone call. The minimum requirements for any performance include backstage facilities, lights, 230V power outlets, and a covered stage as described below.

In special situations when the organizers choose not / or are unable to facilitate a sound system, the band can provide its own PA and monitoring system, including cables and stands, and may be accompanied by their own sound engineer. This requires a mutual agreement and quoting the price from us separately. Parts of the sound technique can be provided. Specifics of our own sound equipment are listed at the end of this rider.

Performance Requirements:

PA System

A professional PA system (not home-made; preferred brands include JBL, EV, L'Acoustics, KV2 Audio, etc.) capable of delivering a clean, undistorted sound pressure level of at least 110dBA.

Stage

A covered, clean, and dry stage with minimum dimensions of 6 x 4 m. We require stage access 1 hour prior to the performance for setup and soundcheck.

Lighting

Minimum lighting requirements: front lighting for vocals (Vocal 1, Vocal 2, Vocal 3 + Piano, Vocal 4 + Guitar) and any other musician in front of the stage, and adequate stage lighting for all musicians to be able to read sheet music. Lighting setups featuring effects, dimming, etc. are welcome.

Backstage & Cooperation

According to the stage plan: 3x 230V outlets, undamaged and certified. IF the band provides its sound engineer, please provide a workspace for the sound engineer (table, chair). For percussion player: 1 chair is sufficient. Non-smoking environment. Secure area to store personal belongings. Refreshments as per your possibilities. Sufficient space for dancing—our audience typically dances, and performances may feature a dance lesson by La Familia Salsa Band. To facilitate smooth transitions to recorded music during breaks, arrangements must be made in advance with the event's DJ. Exceptionally, the band can provide a playlist for the break.

Stage Plan

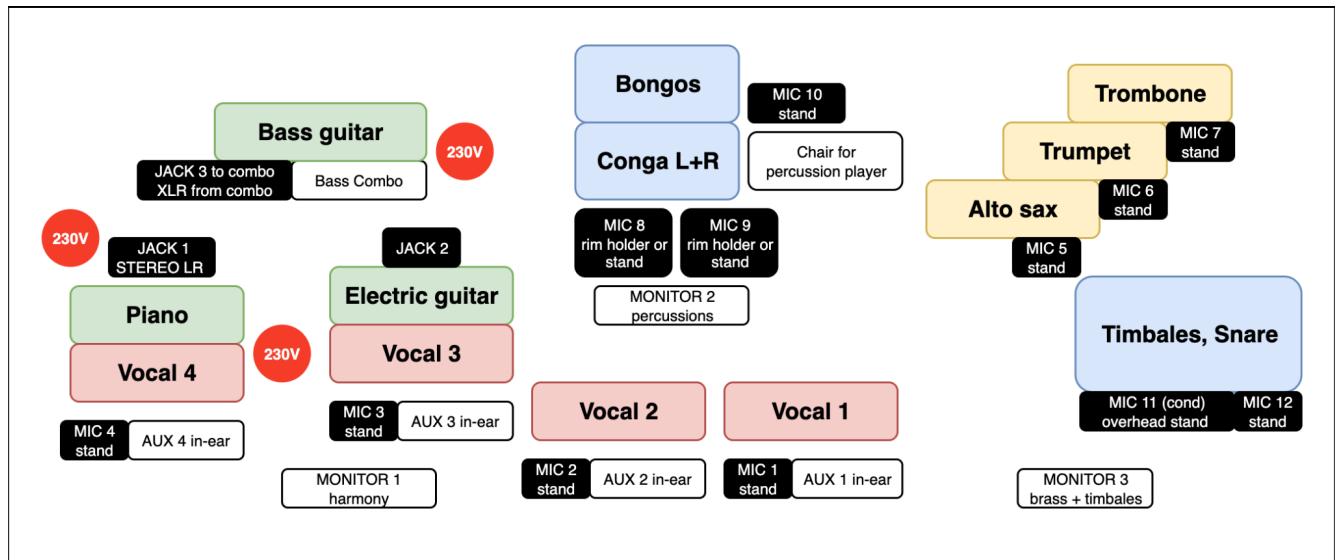

Please provide FOH and the necessary technical equipment according to the Input / AUX List, columns "Requirement", "Cable", and "Stand".

The "Band provides" column lists items brought by the band (you do not need to supply these).

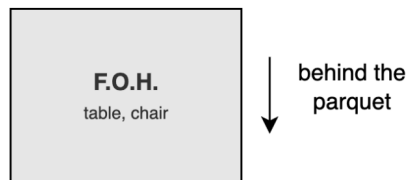

If equipment, stands, and cabling are already set up on stage, the band requires at least 30 minutes for soundcheck.

Changes to the stage plan or sound details can be discussed by phone, no later than a week before the event.

Note: With 9 musicians, we exclude one from MIC5-7; The band also can play in 8 musicians (or less in special cases) - please discuss with the musical director. Most commonly, one of the MIC1-4 may be omitted, possibly one of the Jack2 or 3 inputs.

Dance parquet

Input list

INPUT	SOURCE	Band standard	Requirement	Cable	Stand	Band provides
MIC 1	VOCAL 1	Sennheiser E865	SM58 or equivalent	XLR	Mic stand	
MIC 2	VOCAL 2	Beta 58A	SM58 or equivalent	XLR	Mic stand	
MIC 3	VOCAL 3	SM58	SM58 or equivalent	XLR	Mic stand	
MIC 4	VOCAL 4	SM58	SM58 or equivalent	XLR	Mic stand	
MIC 5 (cond)	ALTO SAX	t.bone ovid system CC100 phantom power	SM57 or equivalent or clip condensator mic	XLR	Mic stand or clip	
MIC 6	TRUMPET	SM57	SM57 or equivalent	XLR	Mic stand	
MIC 7	TROMBONE	SM57	SM57 or equivalent	XLR	Mic stand	
MIC 8	CONGA L	AKG P4	SM57 or equivalent	XLR	Mic stand or rim holder	
MIC 9	CONGA R	AKG P4	SM57 or equivalent	XLR	Mic stand or rim holder	
MIC 10	BONGOS	SM57	SM57 or equivalent	XLR	Mic stand	
MIC 11 (cond)	TIMBALES	SE Electronics	SE Electronics	XLR	Overhead stand	

	OVERHEAD	SE7	SE7 or equivalent (condenser)			
MIC 12	SNARE	SM57	SM57 or equivalent	XLR	Mic stand	
JACK 1 STEREO LR	PIANO			Stereo Jack 6.3mm L+R	Piano stand	Piano stand, Stereo Jack 6.3mm L+R
JACK 2	ELECTRIC GUITAR			Jack 6.3mm		Jack 6.3mm
JACK 3 + XLR	BASS GUITAR			Jack 6.3mm to combo, XLR to mixpult		Jack 6.3mm

Monitor list

AUX	For	Band standard	Requirement	Cable	Stand	Band provides
AUX 1	VOCAL 1	Shure SE215 in-ear, Fischer amp bodypack		XLR		Shure SE215 in-ear, Fischer amp bodypack
AUX 2	VOCAL 2	Shure SE215 in-ear, Fischer amp bodypack		XLR		Shure SE215 in-ear, Fischer amp bodypack
AUX 3	VOCAL 3	Shure SE215 in-ear, Fischer amp bodypack		XLR		Shure SE215 in-ear, Fischer amp bodypack
AUX 4	VOCAL 4	Shure SE215 in-ear, Fischer amp bodypack		XLR		Shure SE215 in-ear, Fischer amp bodypack
MONITOR 1	HARMONY	EV ZXA 8"	Profesional monitor 8"- 12"	XLR		
MONITOR 2	PERCUSSIONS	EV ZXA 8"	EV ZXA 8" or equivalent	XLR		
MONITOR 3	BRASS, TIMBALES	EV ZXA 8"	Guitar combo 12" or larger	XLR		
BASS COMBO	BASS					

If not agreed otherwise, please provide all equipment, stands, and cabling except for the items listed in "Band provides".
If you have any questions, we are happy to clarify.

Sound System Provided by the Band – Prior Agreement Only

The organizer may, by arrangement, rely on the following (complete or partial list):

- Band's sound engineer (for band needs only)
- PA system: 2x EV EKX 15P, stands
- Digital mixer: Behringer X Air XR18
- Monitoring system (combination of EV ZXA 8" monitors and IEMs)
- Cabling and stands

Details of the current equipment setup are available in the input and monitor tables, "Band uses" column.

Important: In case we utilize our sound equipment we need a minimum of 2 hours for setup and sound check.

The organizer is required to provide at minimum:

- Covered stage
- Stage lighting
- 230V power outlets, space for sound engineer and percussionist, dance floor, DJ (as agreed)
- Provision of the PA system is appreciated but must meet requirements

Thank you, and we look forward to working together!
